Acharya University

Karakul, Uzbekistan

To the Admissions Committee,

I am Dr. Vigneshwaran Pandi, Vice Rector (Academics) at Acharya University, Uzbekistan. Previously, I served as an Associate Professor of Networking and Communications, School of Computing at SRM Institute of Science & Technology, Chennai, where I taught Harshal and mentored him throughout his engineering studies. I am pleased to write this letter of recommendation for Harshal. As his Faculty Advisor and professor for core courses such as Database Management Systems (May 2022) and IoT Security (November 2022), I closely observed his academic development and intellectual maturity over the course of his degree. Harshal stood out as a thoughtful and reflective student who consistently applied conceptual knowledge to practical settings. His performance in my IoT Security course was particularly noteworthy—not only did he grasp the technical dimensions of decentralization and network vulnerabilities, but he extended these learnings into independent inquiry, culminating in a blockchain-based electronic voting system for his final-year capstone project.

He led his team in writing Solidity smart contracts and developing a secure user interface, ensuring the integrity and privacy of the voting process. This project showcased his technical mastery, ethical vision, and leadership in guiding peers through complex system design. I believe this speaks volumes about both his intellectual curiosity and drive to innovate. Harshal's greatest strengths lie in his strategic mindset and collaborative leadership. He pairs thorough analysis with practical delivery, having grown adept at setting clear milestones after initially striving for perfection. In addition to his academic achievements, Harshal was also deeply engaged in classroom discussions and consistently respectful of diverse viewpoints. He showed maturity during placement season, not just in preparing himself but also in motivating his peers. I distinctly remember our career readiness sessions, where Harshal's questions and reflections revealed a balance of self-awareness and ambition that is uncommon among his peers.

As a professor with over 24 years of academic experience, I have seen many students rise to challenging opportunities. I believe Harshal possesses the rare combination of technical aptitude and leadership potential that equips him to thrive in international academic and managerial settings. His undergraduate journey reflects a sincere engagement with both technical rigor and personal growth, attributes that make him an ideal candidate for a management program that values both. I anticipate Harshal advancing swiftly from project lead roles into management within five years. His blend of technical expertise and ethical perspective positions him to drive data-driven strategies and secure solutions in global business environments.

In summary, Harshal is an exceptional candidate whose analytical acuity, leadership, and moral compass will make him a responsible and successful manager. I give him my highest endorsement and am confident he will contribute significantly to your Master's in Management program. Please feel free to reach out to me for any further clarifications.

Sincerely,
Dr. Vigneshwaran Pandi
